## e-ASIA Science Talk Luncheon

## at the 15th International Conference on Emerging Infectious Diseases (EID) in the Pacific Rim'

## Sponsored by Japan Science and Technology Agency (JST)

Tuesday 12th March 2013

## **Discussion Report**

Name: Maharaj Kishan Bhan Affiliation: All India Institute of Medical Sciences,

New Delhi, India

Research Specialism: Rotavirus and Gastroenteritis

- 1. What are the current 'hot topics' of research and their significance within your specialism?
- Tuberculosis
- Malaria
- HIV
- Dengue
- Influenza
- Japanese Encephalitis
- ChikV
- Human Immunology
- Microbiome
- 2. Within the field of 'Infectious Diseases', what areas/diseases are prioritized by the countries represented at your discussion?
- Dengue
- Tuberculosis
- ChikV
- Malaria
- Influenza
- HIV

3. In the countries represented at your discussion, what national or regional
programs/initiatives/plans were mentioned that are relevant to research within your
specialism?
<ul> <li>Dengue</li> </ul>
■ Tuberculosis
<ul> <li>Malaria</li> </ul>
<ul> <li>Influenza</li> </ul>
4. What potential areas for multi-lateral research cooperation were identified between the
That potential areas for mail lateral recognition cooperation were lateral settles.
countries represented at your discussion? What research areas within your specialism
countries represented at your discussion? What research areas within your specialism
would benefit from multi-lateral joint research?
would benefit from multi-lateral joint research?  • Dengue
would benefit from multi-lateral joint research?
would benefit from multi-lateral joint research?  • Dengue
would benefit from multi-lateral joint research?  ■ Dengue  ChikV
<ul> <li>would benefit from multi-lateral joint research?</li> <li>Dengue</li> <li>ChikV</li> <li>Influenza</li> </ul>
<ul> <li>would benefit from multi-lateral joint research?</li> <li>Dengue</li> <li>ChikV</li> <li>Influenza</li> <li>Is suggest adding emerging countries to US-Japan Collaboration on multi-lateral</li> </ul>
