Dr. Bun Sreng

Deputy-Director

Department of Communicable Disease Control

Fields of Cooperation

- Infectious diseases
 - Antibiotic susceptibility study for pneumonia in children aged 0 up to 5 years in Cambodia, Lao and Vietnam
 - Operational research to enhance the detection and response to zoonotic diseases

Potential Partners of Collaboration

| Cambodia | Lao PDR | Vietnam |
|---|---------|---------|
| <ul style="list-style-type: none">• Department of Communicable Disease Control (CDC), Ministry of Health• Pasteur Institute of Cambodia• Department of Hospital Services• Cambodia Pediatric Association (CPA)• National Pediatric Hospital (NPH), Phnom Penh• Angkor Hospital for Children (AHC), Siem Reap | | |

Constraints

- Not able to have a joint development of proposal in the region unless the JST or a research institution who takes a lead
 - An example is the London School of Tropical Medicine who lead the research on surge capacity for pandemic influenza
