

## Abstract of Presentation

Presentation Title:

Strategy and Plan for Development of Rural Electrification in the Kingdom of Cambodia

Abstract :

Cambodia has been known as the country where electrification rate is the lowest in the region. Around 25% of the population could access to the grid-quality electricity so far. This presentation shows the development status of rural electrification including generation, transmission and distribution. The structure power sector and its different regulations are also presented. The last part of the presentation will be focused on the future plan of rural electrification in Cambodia. Strategy, development plan, tariff setting and subsidies mechanism will be introduced.
